The titanized mesh implants from pfm medical distinguish themselves with a minimum in inflammation rates and a minimum in shrinkage as they are 100% biocompatible, especially light and hydrophilic.

www.pfmmedical.com

Titanized mesh implants such as TiLOOP® from pfm medical are made of a unique patented composite material with a covalent bonded titanium surface. Their areas of use include operative senology and vaginal and endoscopic urogynaecology.

Benefits

Excellent biocompatibility

- ▶ Ultra light mesh configuration
- ▶ Minimum of inflammation rates
- ▶ Minimum shrinkage

Perfect handling

Due to its hydrophilic TiLOOP® offers perfect conditions to the uro-gynaecological surgeon.

Your personal customized product

pfm medical is offering you to create your own, personalized titanized mesh.

Excellent quality of life

The excellent biocompatibility ensures an absolute minimum when it comes to inflammation rates and a short convalescence time.

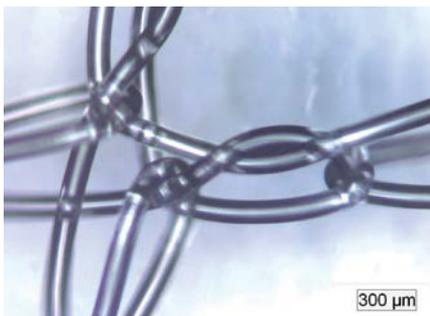

Globally unique technology

The patented nano-technological manufacturing process to form a covalent bond between the titanium oxide surface and the polypropylene is globally unique.

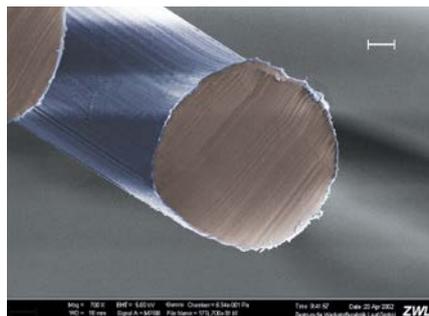

Indication

- ▶ Reconstructive and plastic breast surgery
- ▶ Incontinence surgery (f/m) with TVT/TVT-O/TOT and neobladder
- ▶ Descensus surgery

Knowledge

Pore sizes

Larger than 1 mm

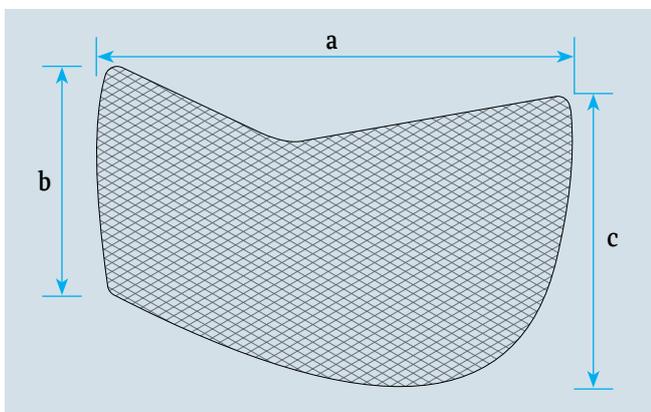

TiLOOP® Bra

TiLOOP® Bra is used during reconstructive and plastic mamma surgery serves to fix the Pectoralis Major. TiLOOP® Bra is covering and securing the position of the breast implants. The TiLOOP® Bra retains the patient's natural breast feeling and it also not palpable or noticeable after surgery (the TiLOOP® Bra is not a tissue replacement). Imaging systems are also not affected by the TiLOOP® Bra.

Indication

- ▶ Skin-sparing mastectomy or subcutaneous mastectomy with a retention of the nipple-areola complex
- ▶ Mastopexy
- ▶ Immediate breast reconstruction
- ▶ Delayed breast reconstruction
- ▶ Change of implant
